

Contrast Poster

Due: May 21

Summary

- Make a poster that illustrates **contrast**.

Guidelines

- Use white 8½" x 11" paper as the foundation for your design.
- Design it in *landscape* format.
- Create a rough version first. [5 pts]
You must use paper and do your draft in pencil.
- Design your poster with the following elements:
 - The word "**contrast**" should appear three times in three very different styles of lettering.
 - Each time, the letters in the word "contrast" should be at least two inches high.
 - Restrict your color selection to three very different (contrasting) colors plus the white of the paper. Using only three colors will unify your poster.
 - Put a contrasting background rectangle behind the word "contrast" at least once.
 - Thick "bubble" letterforms will work best for this. Do your best to create outlines for the letters and fill them in, rather than writing the word "contrast" with simple handwriting.

 
this not this

- Create a final version that shows improvements over your rough version. [10 pts]
 - For your final version, you may use any of the available materials in your design:
 - computers with GIMP or Inkscape, or
 - markers, colored pencils, crayons, rulers, compasses, colored paper, scissors, glue (Do **not** cut pictures from magazines.)
 - Make it colorful.
 - Make it neat. Use a ruler.
Take your time.
- Maximum time for the completed project (both rough and final): 45 minutes

Here is an example with red, black and yellow, along with the white of the page:
